Solution for Bluetooth not working after Windows 10 update

Issue: Even though KNK cutter is connected via Bluetooth, it will not cut from MTC or SCAL and a Com Port assignment doesn't appear in the Port list in the programs.

Solution: Reinstall Bluetooth device driver

2) Click on CUTTER and then

1) On your keyboard, press the Windows logo key and the letter I. Then click on **Devices** to open Windows 10 **Settings**. Your should see your Bluetooth connection for your KNK listed as **CUTTER**:

Bluetooth & other devices
+ Add Bluetooth or other device
Bluetooth
On On
Now discoverable as "2012SANDYHP"
Mouse, keyboard, & pen Wireless Device
Other devices
Paired Paired
click on Remove :

Other devices	
CUTTER Paired	1
	Remove device

3) On your keyboard, press the Windows logo key and X at the same time and click **Device Manager**:

4) Expand **Bluetooth**. Right-click your Bluetooth device and click **Uninstall**. Note that your Bluetooth may be listed with alternate names from what is shown below. For example, it could also say "Intel Wireless Bluetooth."

> 😼 ~ 🚯	Batteries Bluetooth	арнонся цот г нун осницон Ацию Сооссу

	 Personal Are Personal Are Personal Are Personal Are 	Scan for hardware changes Properties	
	8 Windows Phone		

5) Restart your computer. Windows should automatically reinstall Bluetooth after rebooting. Turn on your KNK cutter.

6) Return to the Windows **Settings** window, as in Step 1). Click on **Add Bluetooth or other device** and click on **Bluetooth**:

7) Wait for Windows to locate and identify the cutter. It may initially appear as **Unknown Device** but should change to **CUTTER**:

8) Click on **CUTTER** and then click on **Pair**. The window will expand and you can now enter the **1234** pin and then click on **Connect**:

9) If successful, the following window will open and you can click on **Done**:

9) Reopen MTC or SCAL and your KNK should now communicate via Bluetooth. Remember that in MTC, there will be two BT connections appearing. If you select the <u>wrong</u> one and click on **Test Connection**, you'll receive this message:

10) Select the other BT listing in the menu. In SCAL, select **<Auto Detect>** and the correct Com port should be selected.
