

“An attempt was made to access an unnamed file past its end” error.

Solution from Crazy Mr. Zing:

Have you tried uninstalling then deleting any remaining mtc installation folders

C:\Program Files (x86)**Make The Cut!**

Also there are file relating to MTC in these locations

C:\Users\<Your Windows Account Name>\AppData\Local**Make The Cut! Library**

C:\Users\<Your Windows Account Name>\AppData\Local**Make The Cut! Premium**

Restart the computer the reinstall.
