

## Setup for Printing from CREATE to Your Epson Printer – Mac Version

1. Go to **File>Page Setup** and select your printer:

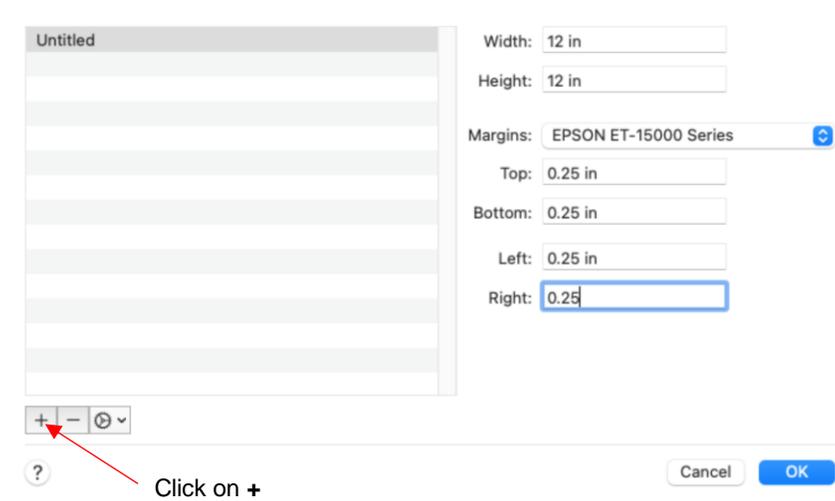

Select your printer. Do not leave set to **Any Printer**.

2. Under **Paper Size**, select from the menu. If you need to add a custom size, select **Manage Custom Sizes** from the menu and the following window opens:

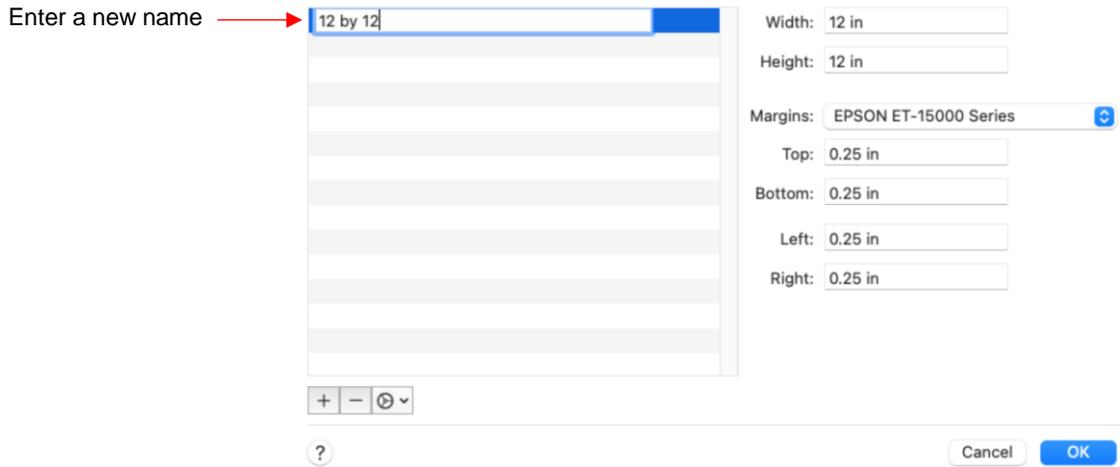

3. Click the **+** button and enter the required specifications:

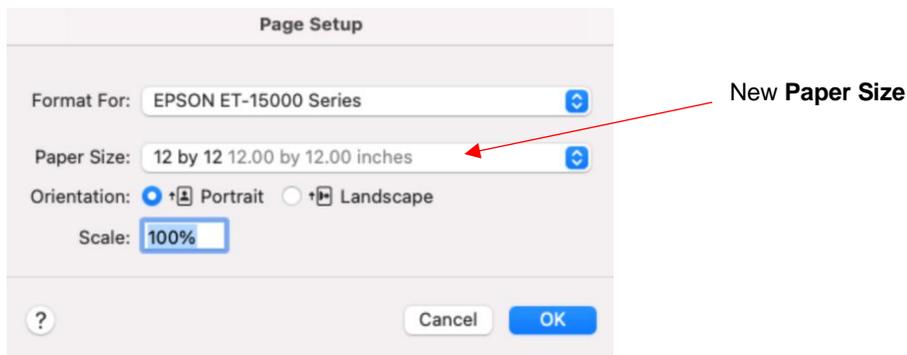

Enter settings

Click on +

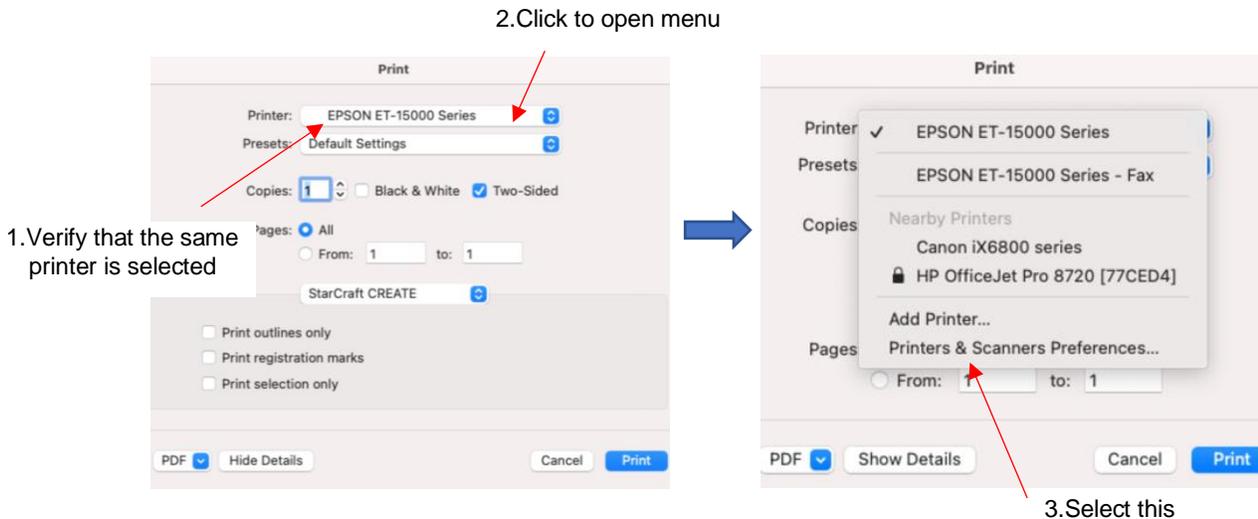

4. Double click on **Untitled** and enter a name for the new paper size:

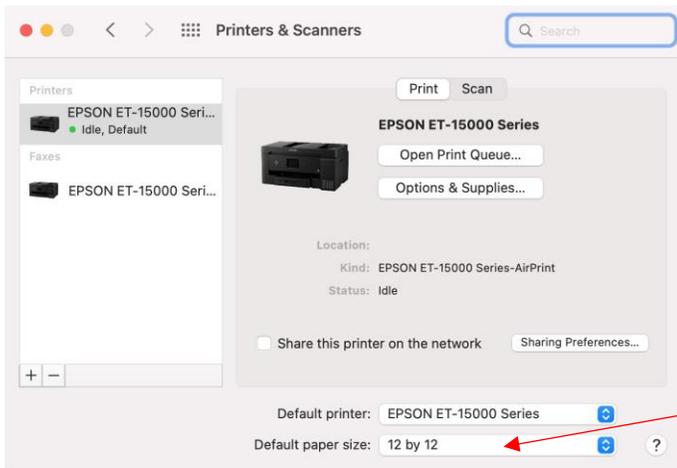

5. Click on **OK** to save and close this window. The **Page Setup** window should now display the newly created **Paper Size**:

6. Click **OK** to close the window and go to **File>Print**. Verify the same printer is selected as in the **Page Setup** window. Then in the **Printer** dropdown menu, select **Printers and Scanners Preferences**:

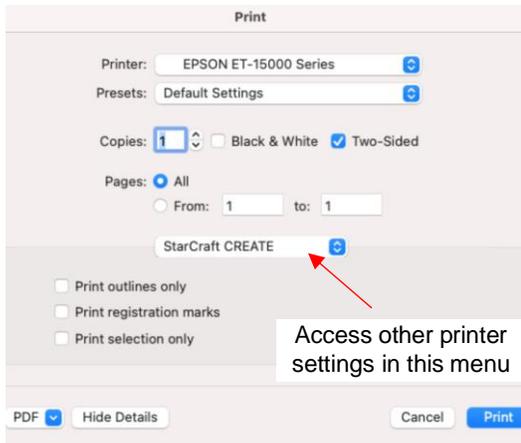

- Change the **Default paper size** to the newly created paper size:

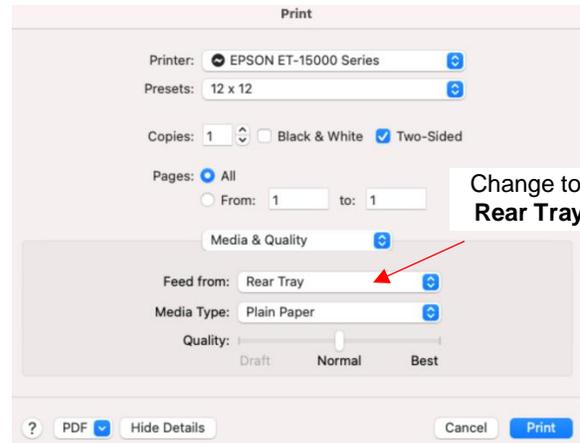

Change to the new **Paper Size**

- Close this window. Make other changes to your printer settings as desired by accessing the menu that defaults to **StarCraft Create**. Note that when using larger sized prints, be sure to select **Rear Tray**:

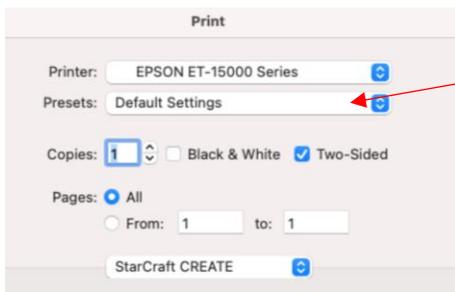

Access other printer settings in this menu

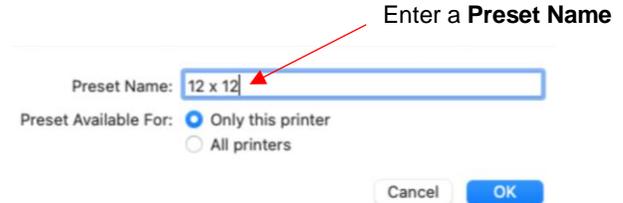

Change to **Rear Tray**

- Once you have the settings for your printer, go the dropdown menu next to **Default Settings** and select **Save Current Settings as Preset**. The following window opens where you can name this preset.

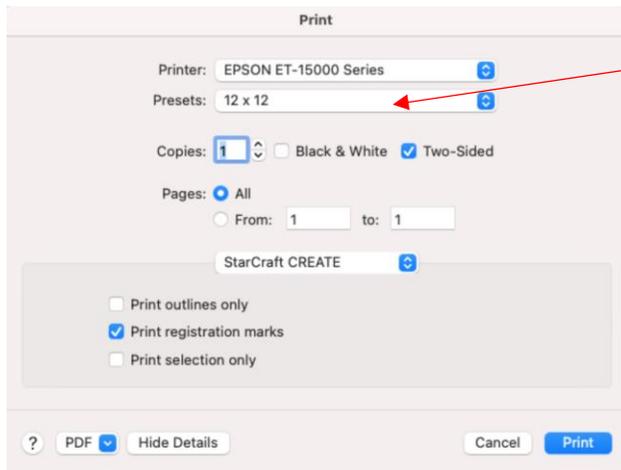

In this menu, select **Save Current Settings as Preset**

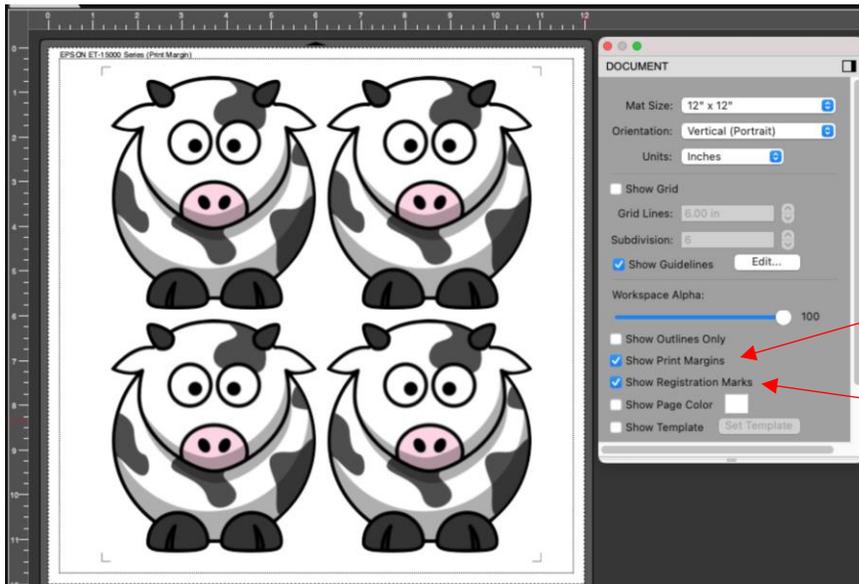

Enter a **Preset Name**

10. Click **OK** and now the **Presets** will display the new **Preset**. Return to Step 7 so that you can change the **Default paper size** back to the size you prefer. Your new **Paper Size** is now stored in the preset you created.

Choose this new **Preset** before printing your project

11. Close the **Printers & Scanners Preferences** window and close the **Print** window. On the **Document Panel**, uncheck the option for **Show Print Margins** and recheck. Also, check **Show Registration Marks**. Verify that both look correct before printing:

Uncheck and recheck this box to update print margins to the latest settings

Check this box to verify reg marks will print within print boundaries
