

## Reference Guide for Setting Up Your New Klic-N-Kut

<u>Unpacking and Setting Up</u>	<u>Software Setup</u>	<u>KNK Setup</u>	<u>Drawing Your First Image</u>	<u>Cutting Your First Cuts</u>	<u>Next Steps</u>
Unpack box and verify contents.	Install software from CD or from <a href="#">here</a> . <sup>1</sup> Locate Activation Pin from CD or invoice.	Plug KNK into available USB port on computer and turn on. <sup>2</sup>	Watch <a href="#">video</a> on Control Panel or refer to Section 1.4.	Watch <a href="#">video</a> on Using the Blade Holder or refer to Section 1.5. <sup>3</sup>	Watch two free videos: <a href="#">Rulers Grid Smart Bar</a> and <a href="#">Toolbars Palettes</a> on screen functions in KNK Studio.
Open <a href="#">user manual</a> . Recommended sections to read are on Page 1.	Register software. If needed, watch <a href="#">video</a> .	Locate COM Port in Windows Device Manager and set in software. Refer to <a href="#">video</a> .	Watch <a href="#">video</a> on Assembling Test Pen or refer to Section 1.5.	Watch <a href="#">video</a> on inserting blade holder into KNK.	Watch <a href="#">more free videos</a> from my blog posts on a large range of topics. And the user manual will provide you step-by-step tutorials.
Spray cutting mat. Refer to Section 1.6	Record Activation Pin in safe place. Back up license files to another folder. If needed, watch this <a href="#">video</a> .	If COM Port does not appear under Ports, watch this <a href="#">video</a> .	Watch <a href="#">video</a> on inserting test pen into KNK and setting pen height.	Refer to Sections 4.2 and 4.3 for details on cutting.	For additional downloadable videos on specific topics, please check out <a href="#">my store</a> .
Attach bolt-on tables. Refer to Section 1.7.	Watch <a href="#">video</a> on Default Settings or go through Section 2.2	Contact your KNK dealer or Accugraphic if you cannot get the USB -Serial driver to be listed under Ports.	Watch <a href="#">video</a> on Setting the Origin or refer to Section 2.3.	The best way to master your KNK is to just start cutting easy materials and seeking assistance when you have questions.	
Cut zip ties on KNK and remove packing inserts.			Create an arrow on the screen and draw it with the KNK. Watch <a href="#">video</a> on Where Images will Cut and practice or refer to Section 4.1.		

<sup>1</sup> If you purchased an older KNK, then use this [link](#) to get Version 8 of KNK Studio for older KNK's.

<sup>2</sup> If you purchased an older KNK, obtain drivers from here: 32 bit KNK [driver 1](#) and [driver 2](#), 64 bit KNK [driver](#). For 64 bit, please watch this [video](#).

<sup>3</sup> If you purchased an older KNK, then click on these links for videos on using [Black Bladeholder](#) and [Original Silver Bladeholder](#).
